Art Unit: 2181

1. Claims 1-23 are presented for examination.

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 14-21 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The current guidelines on patentable subject matter eligibility published in the OG on Nov. 22, 2005 direct the examiner to make a 35 USC 101 rejection when claims are directed to what is a functional material (in this case a computer program) encoded in electro-magnetic signals. In the view of this examiner, claims 14-21 fall within the category of non-statutory subject matter as defined by those guidelines.

4. Claims 1-13 and 22-23 are allowable over the prior art of record.

5. Any inquiry concerning this communication should be directed to William M. Treat at telephone number (571) 272-4175.

6. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
